 Mulch kit does not fit 72" Boss XL units  
 Hand Jack is standard on 72" Boss XL units.

**Your local dealer:**

**Innovative Steering**

Country Clipper's industry exclusive Joystick control is the new standard in zero turn operation. One spin around the yard and you will wonder why you ever did anything else. After you discover the benefits of our Joystick control, the only question you will ask is "Why didn't I do this sooner?"

For a more traditional feel, twin lever steering is also available on select models.

**Comfort & Quality**

So what if your yard is less than perfect? Check out Country Clipper's pivoting axle. The axle flows with the contour of your yard to virtually eliminate scalping and gouging for a quality manicured cut. As an added bonus, the ride is smoother too.

High blade tip speeds ensure a clean cut every time, and deep decks allow precision airflow for even clipping dispersal.

Country Clipper mowers are built to last with a rugged all steel frame and heavy-duty fabricated steel decks with strategic reinforcements.

*I love my Country Clipper because... American made, with so many features others don't have!*  
 Brian N.

**Maintenance Friendly**

When you purchase a quality product, you want the capability to maintain it properly. Only Country Clipper offers the stand-up deck as a standard feature on every machine we build. Gain access to the underside of your deck in less than a minute without any special equipment or ramps.

Additionally, every service point on the machine has been designed for easy access and maintenance.

**Balance & Control**

Large rear tires improve stability while mowing on slopes and help reduce turf damage. Optimized weight distribution ensures tires remain in contact with the turf.

The fuel tank is strategically placed under the seat to provide a low center of gravity for optimum performance on slopes.
